ANNUAL REVIEWS SOCIAL SCIENCES COLLECTION

ABOUT ANNUAL REVIEWS

Annual Reviews was founded in 1932 as a nonprofit publisher dedicated to bringing the most comprehensive scientific review literature to its readers. Today, Annual Reviews journals critically review 40 focused disciplines within the Biomedical, Life, Physical and Social Sciences. Annual Reviews journals operate as a high-quality filter, prioritizing and synthesizing the primary research literature.

Annual Reviews articles are gateways to essential primary research. They critically examine the wide array of available primary research material. They survey books, articles and other sources relevant to a particular topic to summarize and evaluate each important idea and finding.

All topics for review are selected by Annual Reviews' various editorial committees, which are comprised of the most distinguished scholars of their discipline. Each article is written by authors who are invited to contribute by the editorial committees. Historically, Annual Reviews' articles have had a longer usage life than the primary literature. Annual Reviews Journal Impact Factors, a measure of the number of times the average article is cited, are among the highest in the world.
